Provo, Utah

**AIRPLANE ENTHUSIASTS**—Three Industrial Arts Dept. instructors mount an elevator on one of three sailplanes they are building. They are (l. to r.) Wilford J. Colman, Max E. McKinnon and Lester Long.

... than a kite ...

## 3 sports to usher in new sport-sailplanes

Paul Richards  
erse News Editor

Uplane flying is a relatively new sport in Central Utah, will not be when three faculty members finish project of building sailplanes.

Instructors, all of the Industrial Arts Dept. plan to be over Utah County by the end of next summer.

**IDEA FOR** the unusual sport came from Wilford J. Colman, a special instructor in engineering technology. The sailplane, Mr. Tolman is building second, he has been soaring more than 15 years.

Partners are Max E. Mc-  
Kinnon, woodworking instruc-  
tor, and Lester Long, welding  
instructor, both senior. Neither  
has experience in sailplane flying.  
Mr. McKinnon has had flying  
experience as a P-38 fighter  
pilot during World War II.  
Men will be required to  
have sailplane licenses before  
they can fly their own planes.

Mr. Tolman is building his  
airplane according to aeronautics  
agency approved and each plane will go  
through a thorough examination  
before it is airborne, the three men bought a set  
of a model BO-12A Hi-  
performance sailplane about 11  
years ago and started working  
on planes in their spare

time at the slopes in the Snell  
Industrial Arts Building.

"It's your funeral," students  
have said as they watch the  
three craftsmen at work, but  
Mr. Tolman tells them a sail-  
plane is safer than driving a  
car and more maneuverable  
than an airplane.

The BO-12A was designed by

Gar Bringley, a designer of military  
aircraft during World War II and owner and operator of an  
aircraft manufacturing company in California.

**THESE ARE** more than 50  
BO-12A's now under construction  
and many others have been  
finished and thoroughly tested,  
Mr. Tolman said.

When finished, each plane will  
weigh about 525 pounds. Each  
is constructed with high grade  
marine plywood with very few  
metal parts being used, according  
to Mr. Tolman. Although  
parts kits for the BO-12A are  
available, the sailplane enthusiasts  
are making all the parts  
themselves.

"**EACH PLANE** will cost  
about \$700 to complete," Mr.  
Tolman said, "but after we  
can fly for the cost of birds."

The finished sailplanes will be  
taken to the Provo Airport  
where an approved plane will tow  
each sailplane on an altitude of  
about 2000 feet where it will be  
released, Mr. Tolman explained.

**IT IS THEN POSSIBLE**, through

## U. S. image varied: Cooke

Europe's image of America is a product of many factors. All stare Cooke, the man who knows Americans better than most Americans deliver this message Monday to a capacity audience in the Fieldhouse.

Speaking on what Europe thinks of America, the Manchester Guardian correspondent told his listeners that most Europeans have a childhood conception of America which must be overcome. "In my own case," he related, "it was the noble experiment trying to abolish liquor, and the gangster era that followed."

"**THE BEST** image of America was right after the Civil War, when British and French threw away their military uniforms and adopted whole new concepts of war. Then came the robber barons and the chorus girls. America's image was momentarily enhanced during the first world war.

"Then followed the time when Uncle Sam became Uncle Shylock, trying to extract his pound of flesh.

"Hollywood, the most efficient and the worst medium, gave Europe the picture of the gang wars and other violence."

**COKE CALLED** the Marshall Plan the most generous and unselfish act ever attempted by a people. "But the various foreign aid programs have turned many friends away," he said. "We have used our resources indiscriminately simply because a country is against communism."

He cited the example of Spain as a police state with secret police and concentration camps as an example of a country which receives our aid simply because France is anti-Communist.

Those who inhabit the concentration camps are associated to Communists, he asserted.

**CALLING** America a foreign policy rigid, the writer stated that almost every administration has pursued the same basic policy with but little variation. He said that President Kennedy has taken the same basic position in his July 26 speech outlining the course of action on Berlin.

With the recent election, he said, improved the image of the U.S. since the last war this image has varied. It goes up and down. We need a more pliable foreign policy. We must face to reality. We must look for the differences in other people and not the similarities. Then we must accept those differences.

(Continued on page 2)

**AFFIC COURT** — David L. Harmer lists a to a list of traffic violations which traffic court reviews. Members of the traffic court in pin-pointing trouble spots.

Members are (l. to r.) Alan Lont, David L. Harmer, Steve Van Dyke, Gail Marsh and Anita Brownlee.

## Student events to fete important documents

The Constitution and the Bill of Rights will be commemorated in a week of activities beginning Wednesday.

High point in the observance will be a re-enactment of these American documents by Loyd Wright, famous American attorney and former president of the American Bar Association. Mr. Wright will deliver the regular forum assembly address Monday at 10 a.m. in Smith Fieldhouse.

Mr. Wright was formerly connected with the office of the U. S. Attorney General.

**THE UTAH** County Bar Association is planning a luncheon meeting for Mr. Wright, Dallas Young, local attorney, will in the same group will then tour the campus.

Sunday at a fireside meeting of the three BYU stakes, the Hamilton-Jefferson debates will

be re-enacted by two professors of history and political science. Dr. Richard D. Poll will portray Alexander Hamilton in opposing Dr. Stewart L. Grown who will portray Thomas Jefferson.

**OPENING** THE affair Wednesday, Ralph H. Smith, university archivist, has arranged for a display of replicas of the Constitution, Bill of Rights and other historical documents, in the new Library.

Thursday and Friday motion pictures of the American Revolution, the framing of the Constitution and the Bill of Rights will be shown continuously from 8 a.m. to 4 p.m. in the multi-purpose area of the Smith Family Living Center.

BYU will extoll these civil documents editorially during the week, according to Edwin Butterworth, News Bureau director.

Here 8 days...

## Audio-visual Dept. selected for study by Chinese official

A Chinese Nationalist from Hong Kong's United States Information Service will visit BYU from Nov. 17 to 25.

He is Kwang Wai-hing, who is films assistant for the USIS in Hong Kong and supervisor of the film library and equipment. In his job Mr. Kwang selects films for regular and special showings under the supervision of the American Radio and Motion Picture Officer.

MR. KWANG (he is to be called Curly) will tour high school and university audio-visual centers with LeRoy R. Johnson of the BYU Audio-Visual Dept. He will also spend Thanksgiving Day with his uncle, S. Y. Wu, 750 North 900 East, Salt Lake City.

Born in Canton, China, in 1924, Mr. Kwang speaks English fluently. He received the LL.B. from Soochow University Law School in 1949, is married and has three children.

**THE U. S. INFORMATION AGENCY** regularly brings selected, key foreign national employees of its world-wide information centers to this country for orientation and training. These employees are engaged full time in explaining American life and democracy to their countrymen. The study tour is designed to increase their understanding of the fundamentals of the American concept and their effectiveness in presenting the United States to their countrymen, according to the USIA.

After a short period of training in Washington, D. C., the employee visits representative areas of the United States to see all aspects of American life, to meet and talk with people, to visit private homes, and to observe and participate in educational, religious, civic and social activities.

According to the USIA, the orientation program has been a "highly successful project over a period of years. Participants return to their overseas work better informed, more enthusiastic and more effective in their portrayal of America. International relations are influenced by personal friendships developed, they added.

KWANG WAI-HING

## Traffic violations get review by 'unique' student court

BYU's four-man student traffic court, to which students may appear their traffic tickets, is unique in that it is one of the few traffic courts in the country, body president Henry Helleesen.

Created last spring semester, the court works for better student relations with traffic, according to Alan Lunt, court member. Royal Peterson, associate justice of the ASBYU Supreme Court in charge of traffic court, was the first chairman.

**EVERY STUDENT** must pay his traffic fine, said Lunt, but as he goes to Security to pay his fine he can say he would like to appeal the case.

Those who desire to appeal fill out a form describing their case and giving conditions at the time of the violation, said Lunt.

Members of the court read and

analyze the written reports to become acquainted with the facts of the case prior to the court appearance of the appealing student.

**THE NEXT STEP** is to make an appointment with court secretary Anita Brownlee in 180 Student Service Center to appear before the court.

Hours at which these appointments may be made are 2 to 3 p.m. Monday through Thursday and 9 to 10 a.m. Tuesday and Thursday. The appellant at this time submits the completed report form he received at Security, Lunt said.

The court meets in 155 Knight Building 5:30 to 8 p.m. on Wednesdays.

**COURT CHAIRMAN** is Dave Harmer, a junior accountant major from Pleasant Grove. (Continued on page 5)

# Graduate school installs new study-aid program

To acquire a much closer feeling of identity and unity among the graduate students of BYU, the graduate class officers have assisted Dean Wesley P. Lloyd of the Graduate School in formulating a program which they feel will challenge and stimulate every graduate student. The nucleus of this program appears on these pages of today's Daily Universe.

An unique development in graduate study is being instituted at BYU, according to Dean Wesley P. Lloyd of the Graduate School.

Graduate students will be invited to attend a series of four evening meetings under the general theme "The Social Responsibility of Students With Graduate Training."

**IT WILL EMPHASIZE** specialization in graduate study and will feature speakers who are outstanding authors in research and graduate study in the West. Dean Lloyd said.

All meetings will be held on Wednesdays at 8 p.m. in the multi-purpose area of the Smith Family Living Center.

**WIVES AND HUSBANDS** of the graduate students are invited to participate so that they may become more familiar with academic language. Dean Lloyd remarked that this may be an aid to them in conserving in more common language than their graduate partners, since they are not in their labs and classes.

The first of these special meetings will be on Wednesday featuring Dr. Henry Eyring. According to Dean Lloyd, he is a "world renowned theoretical chemist" and will speak on the message; "Specialization: Its Meaning and Function in Modern Culture."

**FOLLOWING DR. EYRING'S SPEECH**, a panel will discuss the topic. Panelists are Marvin Kuchar, graduate student in chemistry from Provo and Betty Harrison from Provo, who is in educational philosophy. With them will be Dr. Smith Broadbent of the Chemistry Dept. and Dr. Mark Cannon of the Political Science Dept.

In addition to the speaker and the panel, important administrative business relating to graduate students will be presented by the dean.

## Dr. Eyring to open series of evening family sessions

An "internationally known" chemist will address the first graduate students' evening session.

Dr. Henry Eyring, dean of the graduate school at the University of Utah and professor of chemistry, will be the guest speaker to address the graduate students as part of the newly organized program, Dean Wesley P. Lloyd of the Graduate School announced.

**ONE OF A SERIES** of four meetings under the general theme "The Social Responsibility of Students With Graduate Training." Dr. Eyring will speak on "Specialization: Its Meaning and Function in Modern Culture."

The meeting will be held at 8 p.m. Wednesday in the multi-purpose area of the Smith Family Living Center.

ACCORDING TO DEAN LLOYD, Dr. Eyring is an "internationally known theoretical chemist." He was an instructor of chemistry from 1924 to 1926 at the University of Wisconsin. At Princeton University, he was a professor of chemistry from 1930 to 1946.

Dr. Eyring was a National Research Fellow, Kaiser Wilhelm Institute, Berlin, 1929-30; a member of Phi Beta Kappa; Sigma Xi, Vice-president and chairman of the chemistry section of American Association for the Advancement of Science in 1946 and is a member of AAAS and is a member of professional societies.

HE HAS BEEN given many awards and medals, including some which are the Alumni Achievement Award from the University of Arizona in 1947, the Ninth Award from the AAAS in 1932 and the James E. Tamm Scientific Achievement Award of Brigham Young University.

Dr. Eyring also is a special authority in the theory of reaction rates theory of liquids, plastics, and metals and the application of the quantum mechanics to physical theory, Dean Lloyd added.

**FOLLOWING THE** main speech, a panel discussion will be presented which features two graduate students and two faculty members.

DR. HENRY EYRING

## U. S. image varied, says Cooke

(Continued from page 1)  
**COOKE TOLD** the neutral nations that the so-called neutral nations feel they can take a middle ground "without leaning towards either of the two monarchies who cast gloom by constantly talking about who holds the bigger bank."

When asked about the future course of foreign policy, the Englishman again called for more pliability. He said that by 1965 three countries will have

the bomb, "which leaves a 51-49 chance that it will not be used. By 1970, however, from 15 to 25 countries will have the bomb, which increases the possibility of its being used to 60 to 1. said Cooke. "That is when the war will increase. After the religious wars of the 15th century, Catholics and Protestants learned to live together. We may have to find such an accommodation with Communism," he concluded.

## Council, 'brass' help . . .

## Aim is to develop individual's power

The essential aim of the Graduate School is to develop the power within individuals to do independent work and to encourage the spirit of research and discovery, states the Graduate School catalog.

**TO CARRY OUT** this, the Graduate School functions under the immediate direction of Dean Wesley P. Lloyd. He is

responsible for administering affairs of the school.

Dean Lloyd works closely with Mrs. Wilson and Vice Pres. E. C. Crockett. Crockett is academic vice president and as such is "deeply interested and administratively helpful on both the undergraduate and graduate programs." Dean Lloyd remarked

**DEAN LLOYD** also works closely with the chairmen of the 43 academic departments and their graduate committees. In this way he is able to operate through the faculty to improve funds for the program.

The graduate faculty is composed of the members of the academic faculty of the school. However, they must be professors, associate professors or assistant professors with terminal degrees to teach graduate school, Dean said.

**THE EDUCATIONAL** Administration department has also initiated the awarding of a two-year certificate in the graduate program.

This, according to Dean Wesley P. Lloyd, is indicative of the advancement of the BYU Graduate School.

Another example of this progress is the growth of the doctoral program. In 1957 the administration and the Board of Directors approved the first doctoral degree program.

**NOW 15** departments offer doctorate degrees and just recently two other "well received" departments have requested the same privilege. They are under study by the Graduate Council and the Administration.

Dean Lloyd also has cited the following recent developments in the graduate program:

**A METICULOUS** observation of standards of admission to degree-seeking status and of selection of faculty members eligible to teach graduate courses and to supervise graduate research.

**B. AN INCREASED** sense of identification of their work and of themselves as a group distinct from undergraduate offerings has developed in the graduate program.

**C. THE** graduate faculty has taken a major part in recommending to the administration approved regulations relative to the graduate faculty.

**D. REGULATIONS** have been brought up to date on master's degrees which provide, under

approval of the Graduate Council, a program of fields supporting the major in lieu of the supporting field.

**E. A REVISED** record system for the students has been developed.

**F. STRICT** academic load limits have been enforced for graduate students recognizing that graduate study is a matter of depth more than breadth.

**G. AN EVALUATION** form has been established for final oral exams for these and dissertations.

**H. AN AUTHORIZED** change in policy makes it possible for a graduate student to receive a stipend for a year if the assistantship is for no more than one-quarter time. This increases the probability of attracting high-grade scholars to the Graduate School.

**I. A GRADUATE** school cannot be held without blame if it encourages or permits unqualified students to proceed with degree-seeking programs only to fail them after one to three years of expensive and discouraging work.

**J. THERE IS** strict compliance with graduate school minimum requirements for admission on a degree-seeking basis. Through the cooperative efforts of department chairmen with Graduate Dean, a more careful selection of graduate students has been achieved.

**THE GRADUATE** School was derived from the graduate division of BYU in 1928. The graduate division was established in 1915 as an administrative unit 47 years after the founding of the Brigham Young Academy in 1875.

Last year, 195 graduate degrees were awarded. Five were doctorates, the first that have been awarded on the new doctoral program.

**AT PRESENT**, there are 1,600 students on an active status working for their masters' degrees. Ninety-five students are registered on the doctorate level.

**ALSO IN THE** college, Clawson, Cannon, Museum, Keeler, Cannon, Curriculum and Family Development and Family Services Dept.; A. John, assistant dean of the College of Education; John H. C. Botany Dept.; B. F. H. Physics Dept.; and Isreal Lehi Hintz, Geology, Chauncey Riddle, Belig. Construction; Robert J. Simcoating Dept.; Lyman director of Libraries and Lloyd, chairman, are the members.

## Plan 'big strict' says Dean Lee

"Building from an reputation for graduate on the masters degree to Graduate School at this time is now taking major to meet the pressing highly trained special needs."

The President and I Trustees have authorized programs in 15 departments of the University. The departments are those prepared for such often students in departments an outstanding library advantage of an in number of high-grade a new chapter is open graduate study at the Yon University."

Dean Wesley P. Cooke

IDEAS TO PLANS—Graduate class vice-president Martell Gee; Bonnie Lach, secretary; Dean Lloyd and Jim Scoresby,

class president; finalize plans for the graduate academic program.

# Dean Lloyd recognized student-faculty leader

By Amundsen

U's Graduate School dean internationally recognized as consultant and administrator, student personnel services and ex-student relations. Dean Wesley P. Lloyd, "Lloyd has also been listed in Who's Who in America since Who's Who in Americanization and Who's Who in

IS A professor of education and was, for two decades, of students at BYU. He appointed dean of the state School a little over a year ago and as such, in his opinion, "is entitled to add a prestige of BYU through his program."

He is married to the former Lillie Murdoch, whom he met while they were students at BYU. They have two sons.

He was appointed director of the Japanese Universities Welfare and Guidance Institute in 1951. This organization is sponsored by the Supreme Council of the Allies Powers at the request of the Japanese Ministry of Education.

HE IS ALSO A special consultant to the University of Burma and works with 23 other universities in Europe and Asia.

Dean Lloyd has authored several articles. Among these are "The University in the Changing Community" in 1961, "Student Personnel Services in Japan" in 1957, "Student Counseling in Japan" in 1953 and "Student Personnel Services in Universities of the World" in 1955.

He is married to the former Lillie Murdoch, whom he met while they were students at BYU. They have two sons.

He will speak on the subject "The Role of Masters and Doctors in Decision Making in Fields Other Than Their Specialization."

Dr. Edwards is now a member of the board of directors of the First Security Investment,

DR. WILLIAM F. EDWARDS

PRES. G. HOMER DURHAM

DR. STEWART WILLIAMS

DEAN WESLEY P. LLOYD

then returned to BYU as assistant professor of philosophy of education and acting of men. In 1939 he was full professor and chair of the Philosophy of Education Department.

WAN LLOYD WAS chairman of the Fieldhouse fund drive at BYU and as such as given much credit for raising funds for the million-dollar building, says Current

newspaper.

## Student officers unite varied abilities to lead

By Amundsen  
U's Staff Writer

Graduate class officers from varied backgrounds, unite in the graduate class for this school year.

Jim Scoresby, graduate class president, is from Iona, N. J. He is seeking a degree in personnel and guidance. SCORESBY PLANS to work with counseling and get a M.A. in industrial psychology. He wants to go into mental work in industry.

He has been a member of A Cappella Choir for three years and recently married the former Rita Haraldsen. He is currently the state representative for the Student Education Association for BYU.

Vice-president Martell Gee is working on his degree in physics. He is presently undecided about going on for his M.A. or going into industry to work for a few years. His final goal is to be a college physics professor.

GEE ATTENDED Ricks College for two years and

State University for one year. He served a Finnish

mission for the Church.

Helen Bartlett is one of the graduate class secretaries. Bartlett is in food and nutrition and plans to teach. From Shortbills, N. J., Miss Bartlett is a member of the local social unit.

THE OTHER SECRETARY position is filled by Bonnie M. Lach from Salt Lake City and plans to get her M.A. Her final goal is to be a fashion designer.

University of Utah graduate, Miss Lach also sings in the Tabernacle Choir.

THE THREE SENATORS are: Roy Bennion, from married and a student in physics; Sharon Johnson, Colton, Calif.; and Larry Wold from Idaho Falls, Idaho, viing personnel and guidance.

## International students slate party

allied in Every Way," the national Students' Party will be held at Cannon Saturday at 8 p.m., says Ghanam, director of the am.

IS PARTY, sponsored by AWS, is in recognition of international students who from 48 different countries and BYU, Ghanam continues.

costumes and international refreshments will be served. The student body is invited, he said.

A GRADUATE student from Tashkent, Russia, and a major in recreational dancing, Ghanam will lead the group in international dances before he presents an international talent show.

The show, according to Ghanam, will consist of solo dances representing Russia, China and

they will wear their native

(Continued on page 7)

## Extra session speakers named

Dr. William F. Edwards

former vice-president of BYU and dean of the college of commerce, will address graduate students at the Feb. 14, meeting.

He will speak on the subject "The Role of Masters and Doctors in Decision Making in Fields Other Than Their Specialization."

Dr. Edwards is now a member of the board of directors of the First Security Investment,

President of the Fidelity Investment Fund and the national representative of Investment Finance.

BYU graduate students will be presented with the thoughts of Pres. G. Homer Durham of Arizona State University.

Pres. Durham will speak at the March 14 meeting on the subject "The Present Critical Need for Advanced Graduate Study."

## Monetary grants aid grad education

The Graduate School offers awards and scholarships to graduate students of high academic and scholastic achievement.

According to a circular published by the Graduate School, three financial aids are offered. These are scholarships and fellowships, teaching assistantships and research assistantships.

THERE ARE 26 scholarships offered with from \$260 to \$2,000 plus tuition and standard fees. Tuition and standard fees plus \$200 to \$1,500 are awarded with the 23 fellowships. Graduate School information reveals,

"Scholarships and fellowships are awarded primarily on the basis of academic achievement and are available to students in all areas of graduate study. Fellowships recipients are given first assistantships to their departments of graduate study," according to the Graduate School pamphlet.

GRADUATE students are employed by many departments as teaching or laboratory assistants. An assistantship is awarded on scholastic ability and the competence to serve in

the specific department. Remuneration varies from \$750 to \$2,000 per academic year.

More information on teaching assistantships is available by contacting chairmen of departments.

Research assistantships allow the graduate student to work part time on research projects. He is under the supervision of a faculty member. Research assistantships have a varying remuneration of \$1,000 to \$2,000 per year.

FOR APPLICATION forms and information, the student should contact his department chairman, states the Graduate School circular.

Applications must be in by March 15. Further information and scholarship application forms may be had by inquiring at the office of Dr. Wesley P. Lloyd, dean of the Graduate School.

## Demand is high for Y grads

"High quality programs leading to master's and doctor's degrees are marks of a university that is academically mature."

"WE INVITE qualified prospective graduate students throughout the Church to give careful attention to the offerings of the BYU Graduate School and to be a part of an advanced program that provides effective specialization without sacrificing the liberal and spiritual character essential to truly educate men and women."

President Ernest L. Wilkinson

## Quality grad work marks of school

"BYU's Graduate School is establishing a fine reputation throughout the nation and especially in the West, because of the high quality of its product—the students leaving the institution are unusual in demand."

"FOR YEARS the process of masters degrees from BYU have been in great demand. The same is now true for those receiving doctorates, even though the first doctorate degrees were awarded in June of this year."

"Dean Lloyd and members of the Graduate Council are to be congratulated upon the leadership being demonstrated in the development of graduate programs on a high scholastic level."

Earl C. Crockett  
Academic Vice President

PRESIDENT CROCKETT

## Broad ability needed for success

"Employers in many fields have concluded recently that success in most any occupation demands not only adequate preparation and production, but also in associating with others as well."

"It therefore behoves every student of learning to broaden his perspective of education somewhat to include more than one area of specialization."

"THIS IS NECESSARY in order that he might be prepared to function intelligently under any condition or situation regardless of whether it pertains to any aspect of learning which has received special emphasis or not."

"WE NOT ONLY encourage all graduates to attend the planned events, but also to institute seminar groups in their departments for the mutual problems, accomplishments and learning might be shared."

"GRADUATE students and others who are now participating in these groups report that rich experiences have resulted from the members of various departments contributing information concerning an unfamiliar area of learning."

"The aid which can be given each student by suggestions of the group regarding a research project and other difficulties encountered by a graduate student, also has proven invaluable."

"THE EVENTS planned for the graduate class this year include a series of which are designed to develop a great graduate school on our campus and prepare each student for the challenges of the future."

Jim Scoresby  
Graduate Class President

PRESIDENT WILKINSON

## Cinema series presents foreign language films

University Cinema, the cultural movie series, has been on the BYU campus this year for over 19 years, according to Dick Benson, Marketing Supervisor of the Department of Audio-Visual Communication.

"The purpose of the current series is to provide movie-goers and foreign language students with really classic films that are educational and both dramatically and photographically artistic," said Benson.

The campus movie program really started about 1942 under the title "Foreign Language Films," explained Dr. J. Reuben Clark, III.

Dr. Clark was a member of the original committee during the war years which first brought the movies to BYU.

"In those days, we used to hold showings in the College Hall, but after a couple of years, we moved them to the J. R. Auditorium, which first brought the movies to BYU."

"They were very successful, seems like everyone came. Since they were the only foreign language films being shown regularly in Utah, we attracted people from as far as Salt Lake City as well as our students and people from downtown Provo."

"I believe we were one of the pioneer institutions in the U.S. in the use of foreign language films," Dr. Clark added.

Over the years, the use of the Hollywood type movie gradually crept in, attracting a different type of audience, Mr. Benson explained. "By this time, the screenings had been moved to 187 Madsen and were dubbed "Film Classics."

Soon sensing the need, the language departments again began to bring in various foreign language films for special showings.

About two years ago, some of those attending the regular campus movies complained of the misnomer "Film Classics." It was decided to change the name to "Film Favorites" and to bring in more foreign culture films under the management of the DAVC, Mr. Benson commented. Room 184 Knight Bldg was chosen as the venue and "University Cinema" the

title for the new series.

University Cinema programs are compiled from suggestions made by interested departments such as History, Language, Music, Art, English, and others.

"The programs are designed to merely pay for themselves rather than to make a profit," he said. "We hope we are satisfying the needs of the greatest number of students."

Most successful film shown so far this year has been the "Ballet of Romeo and Juliet" which drew a full house according to records.

"Even this barely paid for itself since the rental was quite high at \$300. We are charged on a per day basis by a company in the East for use of the films and we hold screenings at 5 p.m. and 7:30 p.m. each Monday and Wednesday," he explained.

"Usually we feature 16mm foreign language films with English sub-titles, but we are also set-up with 35mm sound equipment."

## Workshop slated for student leaders

Leadership Committee sponsors group dynamics workshop for student leaders, Saturday from 9:00 a.m. to 12:00 p.m. in the Student Activity Center, the Joseph Smith Family Living Center, Bob Standing, chairman of the Leadership Committee announced.

This workshop, the first of a bi-monthly series, has been established to assist student leaders and their workers in achieving increased productivity and competence, said Standing.

Leaders and as many from their organizations are invited to attend. The group will review group dynamics and problems in group dynamics and organization will be discussed, Standing pointed out.

Dr. William Dyer of the Sociology Dept. and adviser to the Leadership Committee has this to say about the workshops.

"I would like to encourage the various student leaders to participate in the forthcoming workshop. This workshop will help each individual to become

## Among Alaskan ice caps...

### Millett does glacial research

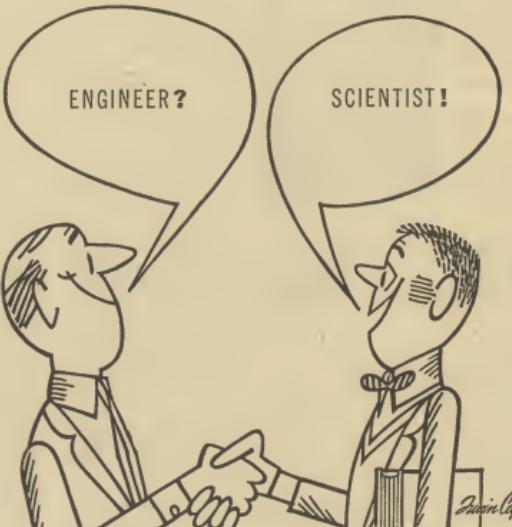

The possibility of a future ice age is under investigation by an assistant professor of geography at Brigham Young University.

Dr. Marion Millett spends each summer among ice caps of Alaska in an effort to determine whether these gigantic formations will expand or recede.

DR. MILLETT first became interested in the project in 1957 when he went to Alaska as a member of an expedition. The glaciologists who undertook the excursion during that summer were determined to see what the earth holds for the earth in the way of weather formations. Each summer they have gone back.

"We want to study climate trends," he commented. "We feel

a more effective group member and group leader by giving him a learning experience in one of the important areas of group leadership."

## Oratorio Choir elects officers, plans program

Oratorio Choir members elected officers and planned production of Mendelssohn's "The Elijah" at their meeting last Friday, said Sandra Jarrell, Oratorio Choir publicity chairman.

**OFFICERS ELECTED** are President Ralph Finlayson, a senior English major from Seattle, Wash.; Vice president John Anderson, a North Hollywood, Calif., junior in education and Secretary Marilyn Stanley, a graduate music student from Heber.

Others elected include historian, Margaret Whittaker, a second year German student of Layton; social chairman, Ariel Bybee, freshman in music from Torrance, Calif.; publicity chairman, Miss Jarrell, a freshman music major from Las Vegas, Nev.

**ACCOMPANISTS** to the choir are Diane Roskelley, a sophomore in music from Bush, Ida., and Preston Larson, a sophomore in music from Overton, Nev.

Choir photographers are Kent Van Doren, a junior of Provo, and Mike Suzuki, a senior music major from Logan.

"*Te Eliyah*" by Felix Mendelssohn will be presented by the choir with the BYU Symphony Orchestra directed by Prof. Lawrence Sardoni Nov. 30 at 8:15 p.m. in the Joseph Smith Auditorium, said Miss Jarrell.

## We're looking forward to meeting you

We'll be on the campus on the dates listed below, ready to give engineering and science seniors information on space-age careers in a dynamic industry.

If you are looking for a company offering assignments on programs of unique interest and career potential, you'll be interested in the advantages Boeing can offer you.

Boeing, for instance, is a major contractor on such advanced programs as the Dyna-Soar maneuvered space glider; the solid-fuel Minuteman missile; the B-52 bomber; and the KC-135 tanker. Boeing is also the world's foremost designer and builder of multi-jet aircraft, including the eight-jet B-52H missile bomber, the KC-135 tanker-transport, the C-135 cargo-jet, and the famous Boeing 707, 720 and 727 jetliners. In addition, Boeing's Vertol Division is one of America's leading builders of helicopters.

Research projects at Boeing are under way in such advanced fields as celestial mechanics, solid state physics, nuclear and plasma physics, flight sciences, space flight and propulsion.

Expanding Boeing programs offer exceptional opportunities to holders of B.S., M.S., and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. At Boeing you'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

Drop in to your Placement Office and arrange for an interview. We're looking forward to meeting you!

## 61 graduates set record for post graduate study

The 1961 college graduating class has set a new record in its desire to go on to graduate or professional education, according to a report published by the National Opinion Research Center at the University of Chicago.

**THE REPORT**, based on a survey of 33,982 graduates from 135 colleges and universities, showed that 71 per cent expected to attend graduate and professional school. Approximately 20 per cent had been accepted for study, while the majority of the remainder plan to attend later.

The single largest field appears to be primary and secondary education, with one out of three seniors expecting enter education on a long-term.

**ABOUT THREE-FIFTHS** of the total are about equally divided among the arts and sciences.

In the arts and science fields, medicine and engineering lead to the highest academic performance. The top quality fields are astronomy, physics, mathematics, medicine, and humanities, biochemistry, engineering, the social sciences, chemistry, psychology and geology.

Probably the most alarming aspect of the report is "despite the prominence of science and heavy emphasis now being given the scientific careers," only 7.6 per cent of those entering graduate study expect to become physical or biological scientists. This is rather odd, in view of the stress a technology since the Russians outstripped us in the missile race.

**ALL TOLD, THIS REPORT** tends to point up the importance of the unique out-of-class activity program for graduate students at BYU.

The program is highly academic yet it crosses academic lines. The graduate student of one department learns something of the field and achievements of graduate students in other departments.

Instead of narrowing the mental vision of the advanced student, his thought and concepts are exposed to broad areas of learning.

**THIS CONCEPT** is unique in that such a program, where all graduate students and their spouses are invited to the lectures, is found in few, if any, U. S. colleges or universities.

Coupled with this new program is a renewed accent on mentorship and research.

In addition, the Graduate School has developed an improved system for evaluating oral examinations.

These, plus the new library, which is ideally adapted to graduate study points up the meticulous attention by the administration of the Graduate School to graduate students and their procedures toward a degree.

**DEAN LLOYD, THE GRADUATE COUNCIL** and the graduate class officers are to be congratulated for their progressive thinking and administrative ability.

### LITTLE MAN ON CAMPUS

"Now, son, how's it happen you want to be a teacher?"

### Three instructors build sailplanes

(Continued from page 1)

utilization of wind currents and updrafts, to gain altitude and stay in the air for many hours, he said.

The pilot feels like a bird completely detached from the earth, he said.

As for the nearby mountains, there is no danger. "Sailplanes thrive on mountains because of the updrafts around them," Mr. Tolman said.

**THE PLANES BEING** constructed have 50-foot wingspans and can fly at 100 miles per hour. They are designed for a top speed of 140 miles per hour and a stall speed of 40 miles per hour, Mr. Tolman explained.

They can be flown as far as 100 miles from the home base and returned without any trouble, he said.

### Court reviews violations

(Continued from page 1)

Members are Steve Van Dyke, senior; Steve M. Madsen; Orlen Oden; Lunt; junior education major from Duncan, Ariz.; and Gail Marsh, graduate student in psychology from Lakewood, N. Y.

Chairman Harmer and two members meet each time.

Defendants are brought before the court where they verbally appeal their case and answer questions posed by the court. Witnesses may be called in by the defendant. In the case of a violation occurring when the car is moving, the arresting officer is brought in, Lunt explained.

**WHEN THE FACTS** of the case have been heard, all but court members are dismissed from the room and the court makes a decision based on the facts and testimony. A majority vote is required for a decision, said Lunt. "The spirit of the law is considered very heavily," said Lunt.

A list of traffic regulations may be picked up from the Security Office, B-6, Student Administration. **Old Spice** Students should be sure they know and understand all regulations, for ignorance of the law is no excuse, emphasized court member Van Dyke.

On the third traffic violation the offender is taken before University Standards, Lunt said.

## Elder Richards slated as devotional speaker

An assistant to the Council of the Twelve of the LDS Church, Elder Franklin D. Richards will speak at the devotional assembly Wednesday.

The 10 a.m. assembly, open to the public, will be in the Smith Fieldhouse.

When he was sustained a general authority of the Church on Oct. 8, 1960, Elder Richards was presiding over the Northwestern States Mission.

Prior to his appointment as mission president he was in the mortgage banking business in Washington, D. C., New York and Salt Lake City. He started in the banking business in 1952.

Elder Richards was born in Ogden on Nov. 17, 1900. He attended school at Weber Academy and the University of Utah where he received the LLB degree in 1923.

After practicing law in Utah until 1934, Elder Richards was assigned to the directorship of the Federal Housing Administration in Utah. He rose to FHA commissioner for 13 western states, Alaska and Hawaii.

After holding this position for five years he moved to Washington, D. C., where he became national FHA commissioner. During his stay in Washington he was president of the elders' quorum and chairman of the genealogical committee.

As a young man he served a two-year Church mission in the eastern states. An official in the Sunday School, he served on the Liberty Stake Board and as a ward superintendent.

The University Chorale directed by Kurt Weinzinger will present special musical numbers for the devotional hour.

## Soph fullback gets 'star' nod

by Jim Burr,  
University Sports Writer

William Ford Nelson was born to be a football player. His dad played quarterback on a Utah State Aggie team back in 1935, and according to genetic theory, like father, like son.

Bill has the honor of being the only sophomore to be selected on this series of articles at *UNIVERSITY Player of the Week*. Due to his outstanding ability and his interest in the game, the sports staff feels that he should be introduced before next season.

**NELSON HAS** played outstanding defense as well as offense. In many games, the records show that he participated in at least 90 per cent of the tackles. He is a good runner and an exceptional blocker on offense. Although he doesn't carry the ball as great distance, he performs a vital function in his blocking chores. He makes few mistakes as is indicated in the post-game films and he is still learning. We will see more of Bill next season.

**FRESHMAN** from Concord, California, Bill played halfback on a league-winning football team for three years, and was captain of that team during his senior year. Since his Concord, Calif., team is the "T", Bill was something famous with the single wing formation. He also participated in wrestling and track.

BILL NELSON

**TURKEY TROT CHAMPS**—Freshman Alan Enke, Provo, (left) receives the first prize turkey from Dr. Israel Heaton of the Recreation Dept. Richard Bradstreet, a junior from New York, won second place and Bill Harris, Las Vegas, won the costume award. Intramural Director Jay Naylor assisted in the presentations.

## Pre-med students grab honors in annual BYU Turkey Trot

by Tracy Wilson  
University Sports Writer

Three independent pre-medical students proved their endurance over 125 other competitors while bringing home the bacon (actually turkey) in the annual Turkey Trot recently.

**WITH A NEW TIME** of 5:26.8, Alan Enke, a freshman from Provo, paced the pack up and around the mile long course which was different this year.

Dr. Israel Heaton, chairman of the Recreation Dept., and Intramural Director Jay Naylor presented a fifteen pound turkey to Mr. Enke and an eleven pound turkey to the runner up and the participant wearing the funniest costume.

## Contacts help athlete's stats

(UPI) At 'Kansas, they're measuring the passing statistics of star quarterback John Hadl as "before contacts" and "after contacts" to find his completion from 33 percent to 65 percent when he put on contact lens eyeglasses in mid-season . . . the easier to see 'em with, natch.

Brings to mind the old field goal kicker of the Chicago Bears, Lee Artoe . . . he was so near-sighted he couldn't always see the goal posts . . . the man who held the ball for him would say, "it's 45 yards, thataway" with point.

(UPI) Abe Rosen, a Philadelphia city official, points out Philly's vast stadium, site of the Army-Navy football game, also is accessible by land, sea and air. As it now stands, the ball park . . . he advises the Philadelphia Arena is a half mile from the Delaware river, five minutes from International Airport, close to the subway system . . . we'll give him a tie—if his subway station is less than 50 yards from the press gate.

(UPI) — The two rival pro football leagues have scheduled their annual college draft meetings only two days apart instead of four weeks apart as last year. American League meets Dec. 2, National League Dec. 4 . . . that means NFL owners can run through their draft in quickie order without having to dash out to a telephone on each round to determine if the boy they wanted to pick next had signed with the AFL.

Ernie Davis, Syracuse all-America halfback, probably will be No. 1 choice in both leagues . . . Bob Ferguson of Ohio State may be No. 2 for both.

# Daily Universe SPORTS

## Oregon State U hosts Cougars at Corvallis

The city of Corvallis will be the destination of BYU's football team Saturday when the Cougars meet Oregon State Leavers in a non-conference battle.

IT WILL be the second game between the two teams. The Beavers waltzed away with an easy 33-0 win over BYU in 1955 when Coach Tommy Prothro made his debut.

A total of 26 returning lettermen are included in this year's Oregon team which has a 3-4 record.

This includes victories over Idaho, Washington State and Washington, and losses to Syracuse, Stanford, Wisconsin and Army.

The Cougars will carry a 2-4 mark to Parker Stadium after winning against Montana and Colorado State.

THE GAME will be the Cougars' second last before they journey to New Mexico for the

season finale in Albuquerque Nov. 25.

Expected to be back in the starting lineup will be Countertack Eldon Firth who has seen limited action the last three games because of an ankle injury.

Much of the OSU defense will be centered around junior quarterback Terry Baker who made football history as a sophomore with 1,473 yards rush and passing.

Strange things happen . . .

## Heritage coeds get chance to chuckle over hall living

By Diana McFarland  
University Staff Writer

Strange things happen at Heritage Hall, residents laughing real as they chuckle over real catastrophes.

"MY FRESHMAN year I had roommate who was doing way with a boyfriend," recalls Jane White, senior from the Andover, Calif. "She used to turn his letters, and we saw her disappear into the bathroom."

"She was in there for a long time," Miss White went on. "We thought she was a s.o.b. We thought we smelt a trace of smoke, but we didn't think too much about it."

"Some time later, my roommate came stealthily out of the bathroom, and we discovered that she had been going on," she said. "She came to me and showed her love letters in the restroom sink, and had caused huge crack in it. It cost her \$5 to buy a new one."

**MISSES WHITE** ALSO recalls another near-catastrophe concerning a roommate who was so toying with an earring as she talked on the telephone. She used the clip of the earring under the lightswitch covering, and at once sparks began to fly.

"We turned off the electricity," said Miss White, "and found that the earring was adhered to the apparatus inside a light switch. However, the works stopped shooting out, and everything was all right until another roommate tried later to get the earring out. She singed her eyelashes, eyebrows, and the front of her hair in the process."

**RECALLING** A faux pas she herself made, Miss White told of how she had put a breakfast in water and then aluminum foil to steam it. She put the pan on the burner, and when she remembered some time later, the water had boiled out, and the bottom of the pan had burned out and fell into the burner.

"I was so upset, I ate the burned remains of the roll," Miss White said.

The girls who lived in Apartment 31 of Felt Hall last year will always remember their "wee" apartment, pal Linda

## Internationals late festive student party

(Continued from page 3)

will. Also on the program will be Miss Melba Egbert, a soprano who sang professionally at Lawrence Welk.

**GHANNAH WILL** present vocal numbers with his dancing partner Marylleen Jensen, leader of BYU's International Folk Dancers.

Ghannah graduated from BYU and will obtain his M.A. degree the June commencement. He teaches classes in ballroom dancing and has been presenting many exhibitions in Provo and Salt Lake City and winning major trophies in dancing contests on television.

**WHEN ASKED** about his feelings concerning BYU and International Folk Dancers, he said, "BYU is one of the safest places to provide opportunity for foreign students to get out of their shells and make them feel at home and to strengthen their spiritual and intellectual growth."

Ghannah is also a member of International Folk Dancers presented last year's program at the AMS-AWS sponsored International Students' Party, "Via a Smile."

**ONE OF THE GIRLS** had brought some honey from home, Miss Giles said. It had hardened, and they decided to melt it. The honey can was set on a burner, and one of the girls noticed that the honey was bubbling strangely. She asked her roommate, who was sitting in the middle of the kitchen floor, to look at it. As they went to the stove, the can blew up.

"Although the two girls were burned little, it turned out to be quite funny," Miss Giles remarked.

"WE had three apartments come in to help us mop the floor, but the more water we used, the stickier it got. Every thing was sticky for weeks," Miss Giles stated.

**A KITCHEN PARTY** resulted in some chilly days for Diana Grant, sophomore from Ogden. She and her roommate, Shirley Wratton, junior from Aplos, Calif.

"We had all the chairs on top of the table. Someone nudged one of them, and it went through the kitchen window," Miss Grant explained.

"It snowed the next day," she

added dolefully. "It cost us \$15 for a new window."

Birthday excitement caused additional excitement for Cindy Elklund last year.

"It was my roommate's birthday, and we wanted to hide her packages when the mail came so that she would get them all at once," Miss Elklund explained.

"THE HALL FLOOR was newly waxed, and I was wearing white stockings," she said. "When I heard someone yell 'Mailman! I ran down the hall, slipped, and put my hand through the window of our front door as I fell!'

Numerous other incidents like these happen in Heritage Halls every day. Vicki Taylor, junior from Salt Lake, compiled a cookbook when she left it on a hot burner. Dee Ann Ziser, sophomore from Sherman Lakes, Calif., and Denise Alley, sophomore from Ogden, burned \$5 worth of space ribs in their dormitory oven during a Thanksgiving dinner. And Kathleen Perona washed her hair in hand lotion and wondered why it wouldn't lather.

For coeds . . .

## Editor slates press meeting

All BYU coeds interested in journalism are invited to attend the organization meeting of the Women's Press Club, said Penne Freebairn, editor of the Banyan.

The meeting will be Thursday at 4 p.m. in the Journalism Reading Room in the basement of the Student Service Center. Miss Freebairn added.

**WOMEN** interested in writing helping on campus publications service projects, speeches, journalistic contests, parties and exchanges are urged to come. They need not be journalism majors, Miss Freebairn emphasized.

Once the group is chartered and becomes operative, according to Miss Freebairn, it could possibly affiliate with Theta Sigma Phi, a national sorority for women.

**BOTH THE** Press Club and the University Journalism Dept. must be inspected by the national sorority's representative before affiliation, she said.

Two years ago, a press club existed for both men and women students. Miss Freebairn pointed out. It was dropped last

year, she said, when the men entered Sigma Delta Chi, men's national journalistic fraternity.

## Problems mount since directory

Problems have increased severalfold for two University departments accustomed to handling the directory, since delivery of the 1961-62 Student-Staff Directory last week.

Persons attempting to call University Standards to discuss school rule violations and other problems, find themselves talking to Dr. Darrel Moses who is in charge of Academic Standards. University Newsrooms, headed by Kenneth Lauritzen, is not listed in the directory.

Noel Duerten, director of Student Publications, publisher of the directory, asked all students and staff to make the following changes in their directories to help direct calls to proper offices.

**UNIVERSITY STANDARDS,** Kenneth E. Lauritzen, B-202 Smoot Administration Bldg., ext. 2723.

**ACADEMIC STANDARDS,** (Continued on page 8)

Now is the time to let your parents know what you need for Christmas! And we'll help you convince them you should have a Remington MONARCH portable typewriter to take the work out of your school work . . . and make homework fun! All you do is fill out and mail the coupon below. Then we write a letter to your folks outlining the reasons why a Remington MONARCH portable can help you get better grades. (Incidentally, the MONARCH portable comes complete with carrying case plus a terrific self-teaching touch-typing course that's a pushover to master!) Ask to see the rugged, modern, compact MONARCH portable at your college store or your Remington dealer! //

**CHECK THESE SUPERB "EXTRA FEATURES":** 1. Single key instantly sets or clears columns and indents! 2. Touch regulator adjusts to your individual "feel"! 3. Variable line space lets you type "right on the lines" of ruled paper! 4. Adjustable paper edge guide lets you insert paper precisely every time! 5. Calibrated scale on paper bail lets you center your headings faster! 6. Numerals and calibrations on paper table simplify margin settings—positively! 7. Erasure table on cylinder simplifies making corrections! 8. Card and writing line scale lets you type more precisely! 9. Removable top cover makes ribbon changing and cleaning easier! 10. Carriage centering device locks machine tight for safer carrying! 11. Two-color ribbon and stencil control! 12. Lighter weight without a hint of flimsiness or "creep" while you type!

# Skylift to open at falls, popular student haunt

By Paul Richards  
University News Editor

A new attraction in Provo Canyon, known as the "Skyride," will go into operation this week, according to Rue L. Clegg, manager and owner.

The "Skyride," an aerial tramway located at Bridal Veil Falls, will undergo a final inspection Tuesday by Otto Luck of Switzerland. Mr. Luck is a safety engineer and official tramway inspector for the Swiss government. Mr. Clegg said.

Following the inspection, which may take one or two days, the tramway will be opened to the public and will remain in operation through the winter. Official opening ceremonies are scheduled for Nov. 10. Mr. Clegg reported.

**THE LIFT** consists of two 6-passenger gondola cars mounted on cables leading to the top of the cliffs west of the falls. Passengers will rise a vertical distance of 128 feet in two minutes, he said.

Atop the cliff, a fenced-in lookout area has been built which provides a bird's-eye view of Bridal Veil Falls and also of Provo and Heber Valleys.

A western style gift shop and snack bar and power machinery for the lift are housed in a building east of the parking area at the base of the falls, Mr. Clegg said.

**THE TRAMWAY** has been built under the supervision of

## Directory changes

(Continued from page 7)

Darrell L. Moses, A-245 Student Administration Bldg., ext. 2695.

A strange juxtaposition of pages comes in the last three pages of the student listing; also, Mr. Duender said, but all names beginning with X, Y and Z are listed for students who registered by Sept. 29.

Mr. Duender said he feels there may be a few other errors in the book and he asked persons finding errors to notify him, in writing, of the correction. His office is 147 Student Service Center.

Paul Hunziker of Switzerland, He directed the construction in Switzerland of the largest aerial tramway in the world and has supervised the building of seven other lifts throughout the world, according to Mr. Clegg.

Much of the tramway machinery was manufactured in Switzerland, he said.

The \$100,000 project has been turned into a family affair, according to Mr. Clegg. His wife, Margaret, his son, John, and his daughter, Ann, all take part in managing the gift shop and the lift.

**MR. CLEGG**, a native of Heber City, is a former state senator, first at Bridal Veil Falls

and now at the falls. Mr. Clegg is scheduled for the opening.

"The falls made a lasting impression on me and I used to visit them often and dream of what could be done with them," he said.

About 1927, Mr. Clegg bought 80 acres of land around and including the falls for \$400. He developed the land into a section of the highway, which had been used as a garage dump, and built a miniature castle on the site.

Mr. Clegg said BYU students used the castle for dances and other social events until it was destroyed by floods caused by torrential rains in 1938.

**EXCEPT FOR** improvements on the parking area and hiking trails, no further plans for the site were formulated until about three years ago when Mr. Clegg decided to construct the tramway.

For moonlight excursions, Mr. Clegg said he is going to install colored lights to illuminate the falls.

Actual construction has been underway for more than a year, he said.

Although the tramway is completed, Mr. Clegg said he has just begun to build his castle.

**HE PLANS TO** restore vegetation which has been destroyed along the highway and picnic areas will be constructed near the highway.

For moonlight excursions, Mr. Clegg said he is going to install colored lights to illuminate the falls.

Long range plans include the construction of a banquet hall on top of the cliffs and a lodge at the base of the falls, but these projects will probably be undertaken by his grandchildren, Mr. Clegg said.

Long range plans include the construction of a banquet hall on top of the cliffs and a lodge at the base of the falls, but these projects will probably be undertaken by his grandchildren, Mr. Clegg said.

## Campus news briefs . . .

### English tests to be Saturday

The Junior English Proficiency Examination will be given Saturday in the Eyring Science Center to all first semester juniors who have completed their freshman composition requirement," said Charles D. Taate, Jr., Junior English Proficiency Exam chairman.

**ALL STUDENTS** who plan to take the test will follow this schedule: K-N 230 ESC, 9:30-12 a.m. O-Sp 260 ESC, 8:30-12 a.m. Sq-270 ESC, 8:30-12 a.m. A-CI-230 ESC, 1:30-5 p.m. Cm-G 260 ESC, 1:30-5 p.m. H-J 270 ESC, 1:30-5 p.m.

A separate room for administration will be furnished. But each student must bring his current activity card, with his photograph attached, for identification.

**EVERY STUDENT** must have completed the English Proficiency Examination at least one month prior to the date of graduation. In the event that a prospective graduate cannot complete his requirement by that time, it will be necessary for him to postpone his graduation until the next commencement," said Mr. Taate.

## Civil Service slates talks

U. S. Civil Service Commission Recruiting Representative, Elbert F. Floyd, will speak Tuesday at 10 a.m. in 301 McKay Hall. All students interested in learning more about Civil Service job opportunities should hear Mr. Floyd at that time.

\* \* \*

The record hog scheduled for Saturday at 8:30 p.m. in Cannon Center has been replaced by an International Student Party featuring dancing and international entertainment.

All students are invited to the stag or drag party beginning at 8 p.m. in Cannon Center.

\* \* \*

## Federal jobs to be topic

Opportunities for careers in the federal government will be outlined for Brigham Young University students Tuesday at 3 p.m. in 115 Knight Bldg., according to Dr. Steven L. Grow, director of the BYU Institute for Government Service. Students and faculty are invited.

## IOC needs students for council positions

"Unknown to many able individuals on this campus, there are many positions open in the various areas of student government. Many of these will be open to those who have a desire to gain administrative experience," said Mervin White, who heads a large section of student government as IOC president.

"**THERE ARE** hundreds of BYU students who have ability and many qualities of leadership which could become developed if they would seek out opportunities," said Judi Rasmussen, chairman of IOC publicity.

White has announced three positions under the IOC which need able students to fill them. One is for the manager of the IOC staff for an auditor. Applicants for this position should have business and auditing experience.

The IOC Court has an opening for a prosecuting attorney who will assist Dave Stone in his position. A challenging job is waiting for anyone interested.

**PUBLISHED** Monday through Friday during the academic year except during vacation and examination periods. The paper is published at Brigham Young University, Sec. 115 Knight Bldg., Provo, Utah 84601. Subscription \$8.00 per year. Printed by Brigham Young University Staff.
